

CAREER & INNOVATION HUB

[BIRS](#) is proud to host the inaugural [Math-Science Career Fair](#) as part of the [Career & Innovation Hub](#). This three-day virtual event (March 18 – 20, 2020) will bring the upcoming math-science workforce together with employers in emerging fields.

COMPANIES:

The Math-Science Career Fair is an excellent opportunity for employers to reach today's brightest math science job candidates. BIRS has worked with a broad network of educators and career advisors to attract an intelligent and engaged pool of candidates with specialties in mathematics, statistics, computer science, and other analytical disciplines.

We are seeking employers to host virtual booths. These booths are easy to set up and offer some customizable fields that employers can tweak to their liking. The booths will be visible through the entire 3-day event. Here is an [exhibitor guide](#) link that may help you visualize the process.

There is no fee for hosting these booths, however, we are asking employers to have a staff member present during some of the following time-slots:

March 18	12:00PM - 2:00PM (MST)
March 19	11:50PM - 12:45PM (MST)
March 20	12:00PM - 2:00PM (MST)

If your company is interested in hosting a virtual booth please send an e-mail to birs-facilitator@birs.ca.

STUDENTS:

Students seeking employment in a math science role will learn about today's job landscape from industry-leading companies and interact with recruiters. The event will host a slate of employers that range in size and scope: from start-ups to established corporations; private companies from public institutions; and drug developers (Pfizer) to leaders in AI & Data Science (Google, AWS). Quantitative skills are valuable to companies of all shapes and sizes and the Math Science Career fair will help students appreciate the value of their skills to employers while discovering potential internship and job placements.

Student tickets are \$12.15 (CAD) and can be purchased at [this link](#).

There are a limited number of discounted tickets available. Students who are unable to attend due to financial circumstances can e-mail birs-facilitator@birs.ca to enquire about discounted tickets.
